See what its like to be a part of our
team and go places...

Are you considering working with us?

Hello there,

Thank you for considering working with us. We are excited about talking to you and finding out more about you.

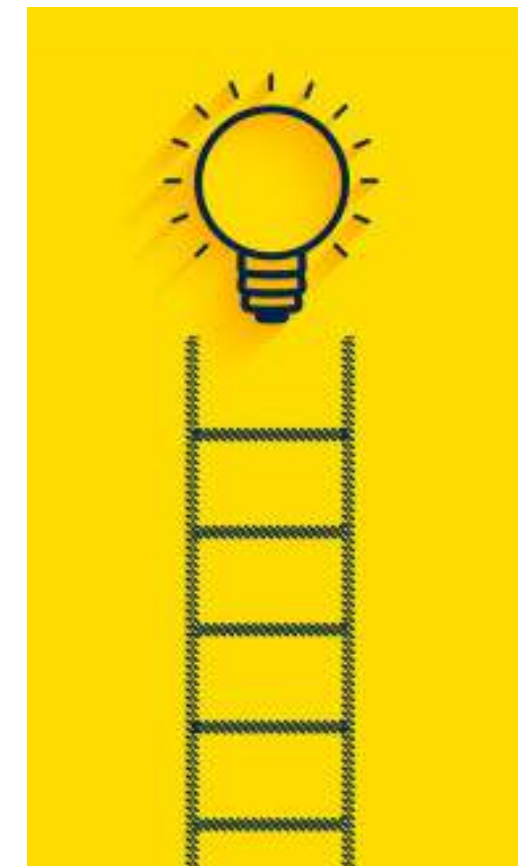

However, you need to like us as much as we need to like you. Working at MPloyChek is not for everyone and you need to know a bit about us. In this presentation, we hope to give you a small glimpse of what it would be like if you are part of the team.

Do feel free to visit our website, come on over for a coffee, or just email us with questions if you have any. We are happy to chat always.

Let's get started

Who are we?

MPloyChek is an AI driven recruitment workflow solution that uses a blockchain to eliminate risk, reduce time and manage complexity in the background verification process.

Our Flagship Product

MPloyChek transforms background verification with instant API-based checks, connecting to diverse databases like EPFO, E-Courts, and more. It guarantees authenticity by sourcing data directly with candidate approval, and blockchain ensures secure, compliant, and owner-controlled storage. With a powerful routing engine, it reduces verification time by 25% and simplifies the process, offering a streamlined, efficient solution.

Our Founding Team

Arvind R A

Giri Venkataramanan

Chief Technology Officer

Ex Director at Fidelity Investments with 19 years of IT Experience. Expert in high-performance technology projects for finance. Deep understanding of Blockchain. Ideal CTO for MPloyCheck. Holds a Post Graduate degree in Information Technology.

Working with us

Is it work? Is it play?

The jury is still out. Sometimes its work. Sometimes its play. But its always fun. We are located in a beautiful part of one of India's metros. We have a great office. Our people are smart. We work with the latest tools and are agnostic to platforms. And we are always doing new stuff. Now is that work? Or is that play?

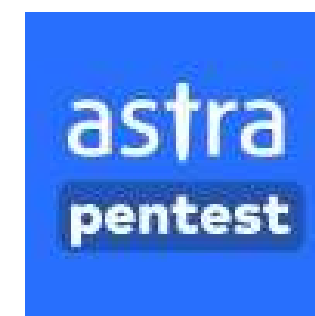

This is **WHERE** we work

Our snazzy, modern office is located just off Harrington Road in Chennai. Its one of Chennai's poshest areas, close to all the action in one of India's top metros. We are close to the all forms of transport from suburban train service to the metro. **Starbucks, Shoppers Stop, Old Madras Baking Company and Kailash Parbhat** are some of the hot and happening shopping and eating joints just a walk away.

This is **WHAT** we work with

We use the latest tools and work on the latest technology always. We are platform agnostic and will use the best tools for the job. Sometimes we might pick old tech - but that's only because it just works. We are not afraid to try new things. We are currently working on integrating machine learning and generative transformers into our blockchain projects. But it's always best practices...

This is **WHO** we work with

Senior Management

Older, wiser, our founders have almost 30 years experience in starting up and growing multiple businesses over the years. They bring vision, balance, foresight and a wider world view that connects the dots that many don't see.

Team Leads

Dynamic and entrepreneurial - these turks know how to do and how to think. They bridge the larger vision of the company to the front line and bring a combination of deep technical expertise and a large commercial view. They continue to learn and teach.

Team

These younglings are passionate and drive the company forward. They consume knowledge and spit out outstanding code, business development ideas and social media campaigns. They join our team because they bring to the table as much as they take.

Our Work Style

- We work from the office - because we believe creative work needs to be done face to face
- We are a team of adults. We don't micromanage. Each of us is responsible for our own actions.
- We develop and provide solutions. We don't know what tasks are.
- Deadlines - are dark and gory. We are afraid of them and will not cross them.
- Good developers write good code. Great developers copy good code. We try to be great most of the time.
- ChatGPT is our new best friend.
- If you don't like the work, this is not the place for you.

We want to work with you if...

- Are passionate about your work
- Can put your clients and customers first
- Can teach us something we don't know
- Appreciate the skill and talent around you
- Are curious and stay on the cutting edge of whatever you do
